

PugetSoundPartnership

our sound, our community, our chance

Washington Policy Center

July 21st, 2011

A vibrant underwater scene featuring several jellyfish. In the foreground, a large, orange and yellow jellyfish with long, thin, purple tentacles is prominent. Behind it, several translucent, blue and white jellyfish with long, thin tentacles are visible. The background is a deep, clear blue-green color, suggesting a healthy marine environment.

PugetSoundPartnership

our sound, our community, our chance

Our Mission: To lead a science-based, results driven, publicly embraced partnership to implement the Action Agenda for the restoration and protection of Puget Sound.

Agency Priorities

- ◆ **Identify and prioritize recovery actions**
- ◆ **Performance management and accountability**
- ◆ **Support partners with implementation efforts**

Action Agenda Update Focus

Wastewater

Stormwater

Nearshore Alteration

Land Use

Priority Ecosystem Services

Tier 1: Water, Water regulation, Recreation and ecotourism, Ethical and existence values

Tier 2: Capture fisheries, Aquaculture, Water purification and waste treatment

Special Projects

- ◆ **In-Lieu-Fee Compensatory Mitigation**
- ◆ **Stormwater Retrofit Prioritization**
- ◆ **Shellfish Growing Area Restoration**

An underwater photograph showing a red fish swimming over a rocky seabed covered in green algae and small shells. The fish is positioned in the upper right quadrant of the frame.
