

POLICY NOTE

Union executives may use strikes to close Spokane schools over pay demands

By Liv Finne, Director, Center for Education

August 2018

Key Findings

1. Teachers in Spokane are paid on average \$68 an hour, including benefits.
2. The workers who pay their salaries are paid on average \$33 an hour, including benefits.
3. Union executives are using the threat of illegal school strikes to demand higher pay.
4. The current compensation system for teachers is not fair to teachers or students.
5. Washington Policy Center recommends discarding the rigid wage ladder, and doubling the pay of the best teachers.
6. Teacher pay is also limited by the hiring practices of the Spokane Public Schools, where only 53 percent of employees are teachers.

Teachers in Spokane already average \$68 an hour, while workers in Spokane who pay their salaries average \$33 an hour

Background

This summer officials at 250 of the state's 295 school districts are renegotiating work contracts with teachers and other school personnel. The WEA teachers union wants up to 21 percent more money for teachers and 37 percent more for non-teachers.¹ WEA executives say they will close the schools by calling more school strikes this fall, although teacher strikes are illegal under state law.

Union executives have targeted schools in six districts for closure. These are Seattle, Kent, Kennewick, Mukilteo, Evergreen (Clark County), and Washougal. Union executives want their own members to receive more money from public budgets, but that does not mean current pay levels are unfair or too low.

Even in Seattle, officials see the union's money demands as unreasonable. As Seattle Deputy Superintendent Stephen Nielsen says, "We don't have the money to do that."²

Spokane

The WEA union is demanding that Spokane Public School officials provide double-digit pay increases to its members.

The WEA knows the state of Washington has already dramatically increased funding for public schools. State spending on K-12 schools has increased from \$12.9 billion in 2009 to \$22.6 billion today. This is an increase of 75 percent, nearly doubling over the last ten years.

Dahlia Bazzaz and Neal Morton, *The Seattle Times*, July 12, 2018, at <https://www.seattletimes.com/seattle-news/education/seattle-public-schools-is-back-at-the-negotiating-table-for-teacher-contracts-heres-how-its-going-so-far/>

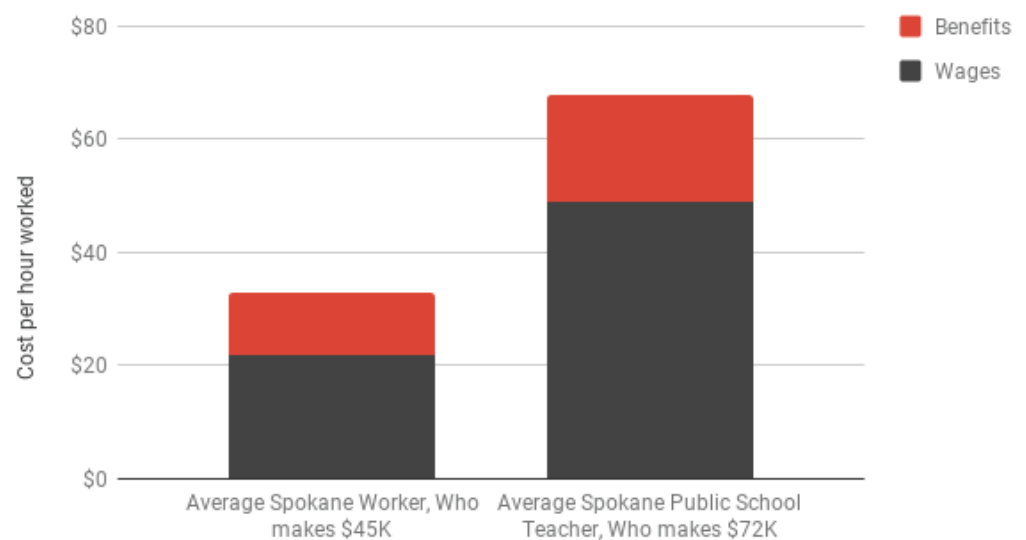

The budget of Spokane Public Schools has grown from \$308 million in 2008-9 to \$419 million in 2017-18, an increase of 36 percent, from \$11,100 per student to nearly \$14,000 per student.³

Average teacher pay in Spokane is now \$68 an hour, including benefits.⁴ Teachers in Spokane can earn as much as \$124,000 in salary, plus benefits, or \$102 an hour.⁵

In contrast, the average Spokane working family that helps pay these salaries makes \$33 an hour, including benefits.⁶

This chart illustrates this sharp disparity in pay between public school employees and average private sector workers:

Salaries and Benefits Per Hour Worked, Spokane, 2017-18

Yet the current compensation system is still not fair to high-performing teachers, or to students. The best teachers are paid according to a rigid union pay scale which rewards seniority, not merit nor value to students. For example, under this system an elementary physical education teacher with seniority can make \$90,000 a year, while a young high school science teacher makes only \$45,000.

Teacher pay is also limited by the large number of non-teachers that districts hire. In Spokane Public Schools, for example, only 53 percent of employees are teachers.⁷

To the credit of district leadership, in 2015 Spokane Public Schools authorized two new charter schools to serve Spokane families. Public charter schools are not restricted by teacher pay rules governing district schools, and have the freedom to introduce new models for teacher pay and for the allocation of school personnel.

Washington Policy Center recommends discarding the rigid seniority-based wage system and doubling the pay for the best teachers.⁸

Conclusion

Teachers deserve good pay for their important work of educating children. Far from being “unfair,” state-reported data shows teachers already receive nearly double the pay that typical Spokane taxpayers receive.

Unfortunately, public financial data and the spike in school spending since 2008 indicate that for WEA union executives more money is never enough. Receiving higher pay, more benefits, a shorter work year and greater job security than most family workers would certainly meet the definition of “fair” for most reasonable people. In fact, teachers on average are paid more today than most of the taxpayers who fund their salaries.

The WEA’s strike threats should be assessed in light of how much school teachers receive now. By any reasonable measure, the pay and benefits the public pays to school employees is more than fair.
